HEADING TOWARDS THE FUTURE

The Port of Bilbao is progressing in all directions. In logistics capacity, new infrastructures and services, in innovation. Besides its privileged geographical location, it offers modern and functional services with a wide range of maritime services open to all international markets. It has marvellous land and rail connections improving its logistical potential, its intermodalism. We have made constant progress for over 700 years to keep ahead of our users' requirements. Over the last 20 years we have been preparing for the future, executing our most important extension and improvement project to date. This project is converting us into one of the biggest European ports of reference.

IN THE CENTRE OF THE ATLANTIC

In the middle of the Bay of Biscay, equidistant between Brest and Finisterre, the Port of Bilbao is central in the European Atlantic. For almost 700 years, this central location has made Bilbao a privileged link with the main ports in both the American continent and the north of Europe. An offer of regular services connects it with 800 ports worldwide.

The Port of Bilbao works with all classes of goods and vessels. It is open and operative 24 hours a day, every day of the year. It has no problems of drafts or tides.

DISTANCES BETWEEN THE PORT OF BILBAO AND THE FOLLOWING WORLDWIDE PORTS

LAND ACCESSES

HINTERLAND

Equidistant between Bordeaux (341 kilometres) and Madrid (396 kilometres), the Port of Bilbao operates inside a hinterland also marked by the towns of Toulouse, (456 kilometres), one of the centres of the European space industry, and Zaragoza (304 kilometres), a great logistics and industrial platform, and capital of the Ebro Corridor, which links Bilbao to Barcelona, with an extension to Madrid.

Besides, the Port of Bilbao is directly linked to the motorway network offering competitive intermodal means to reach the whole Iberian Peninsula. More than 60 million people live in the Hinterland, easily reached from the Port of Bilbao.

SUPERB CONNECTIONS

LAND ACCESSES

ROAD:

A-8 MOTORWAY: Bilbao - France and Santander.

Links at Eibar – Elgoibar to relief road Placencia, Vergara and Mondragón; at San Sebastián to N-1, Tolosa; at Behobia with French motorway to Bayonne and Bordeaux.

A-68 MOTORWAY: Bilbao - Zaragoza.

Links at Altube to Motorway Diputación Álava, Foronda (Vitoria) Airport and Vitoria (N-1 and N-240 to Pamplona); at Miranda Motorway A-1 Burgos and Motorway Norte (Madrid); at Alfaro Motorway A-15, Pamplona; at Zaragoza to Motorway A-2, Lérida, Tarragona and Barcelona.

RAIL:

SPANISH NATIONAL NETWORK.

Bilbao - Miranda de Ebro Line,

where it forks in two directions: Burgos - Madrid and Zaragoza.

Bilbao Centre - Santurce Line.

Barakaldo - San Julián de Musques Line.

Bilbao - Santander Line.

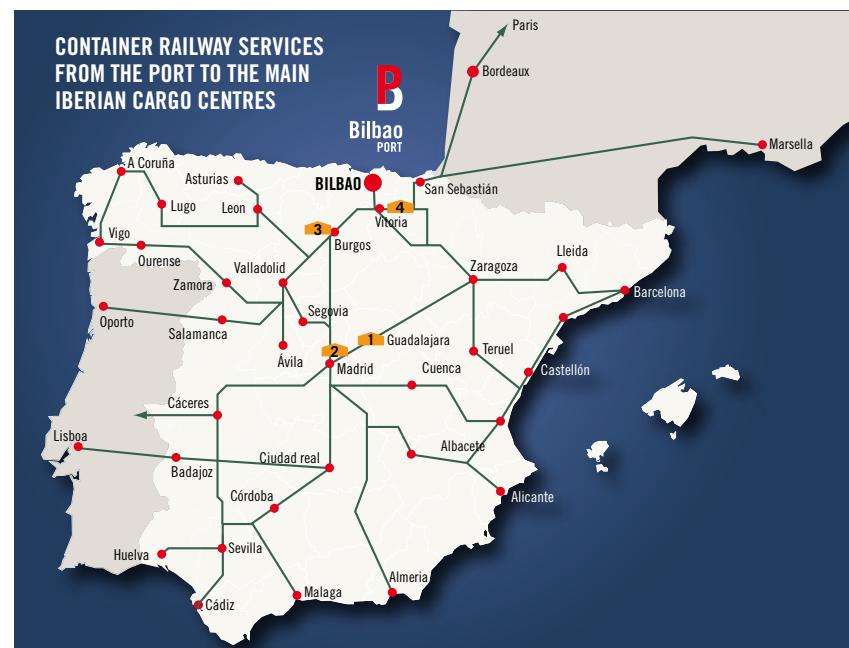

DIRECT LINK TO THE MAIN EUROPEAN TRANSPORT NETWORK

All Port of Bilbao docks have road and rail accesses directly linked to the trans European networks.

AN EFFECTIVE NETWORK OF INTERMODAL SERVICES

A growing network of dry ports – a complex with no access to the sea, but with transport infrastructures and set up at multimodal terminals that enable their goods to reach the sea port they are linked to - constitutes an added value for the Port of Bilbao. Besides the sea access of this network, which extends from Bordeaux to Zaragoza, Toulouse and Madrid, the Port of Bilbao is a partner holding in the Dry Port of Azuqueca in the Henares Industrial Estate – a large industrial centre between Madrid and Guadalajara- in the Dry Port of Coslada (Madrid), and in the company promoting the Dry Port of Villafría (Burgos) and in the Dry Port of Jundiz-Vitoria (Alava).

DRY PORTS LINKED TO THE PORT OF BILBAO THROUGH THE RAILWAY NETWORK

- 1 Azuqueca de Henares (Guadalajara)
- 2 Coslada (Madrid)
- 3 Villafría (Burgos)
- 4 Jundiz (Alava)

Dry port
Azuqueca de Henares (Madrid)

It is hard to imagine that there is a diverse and animated community under these waters working hard to construct a prosperous future.

SD

SUSTAINABLE
DEVELOPMENT

B

SUSTAINABLE DEVELOPMENT

A fire truck to prevent accidents during the unloading of hazardous goods.

The air quality control stations network of the Bilbao Port Authority consists of an Automatic Weather Station and three fixed measuring cabins.

The Port Authority of Bilbao is in the vanguard of Corporate Social Responsibility (CSR) in which it prioritises Quality, Prevention and Environmental activities.

The fulfilment of customer and user needs and expectations, the recognition of the right to health protection at work and environmental impact control make up the core of the Port Authority's sustainable development policy.

In this sense, the Port has put an Integral Management of Quality, Prevention and Environment System into action.

To carry out these commitments, the Port of Bilbao has adopted the management models set out in the latest versions of norms UNE-EN-ISO 9001, OSHAS 18001 and UNE-EN-ISO 14001.

B

BORDER INSPECTION POST

PIF

The Border Inspection Post of the Port of Bilbao is situated between the old Santurtzi Breakwater and the Noatum Container facilities on Dock A-1. It occupies 3,800 square metres of built surfaces subdivided into two zones. The first, with an area of 1,350 square metres, is dedicated to offices, while the second 1,900 is equipped with the most advanced industrial cold technology, thermal isolation systems and resistant and easy-to-clean materials.

The post has 16 unloading docks and is equipped with an electronic system which facilitates inspection tasks for all agents concerned.

B

SECURE AND SAFE OPERATIONS

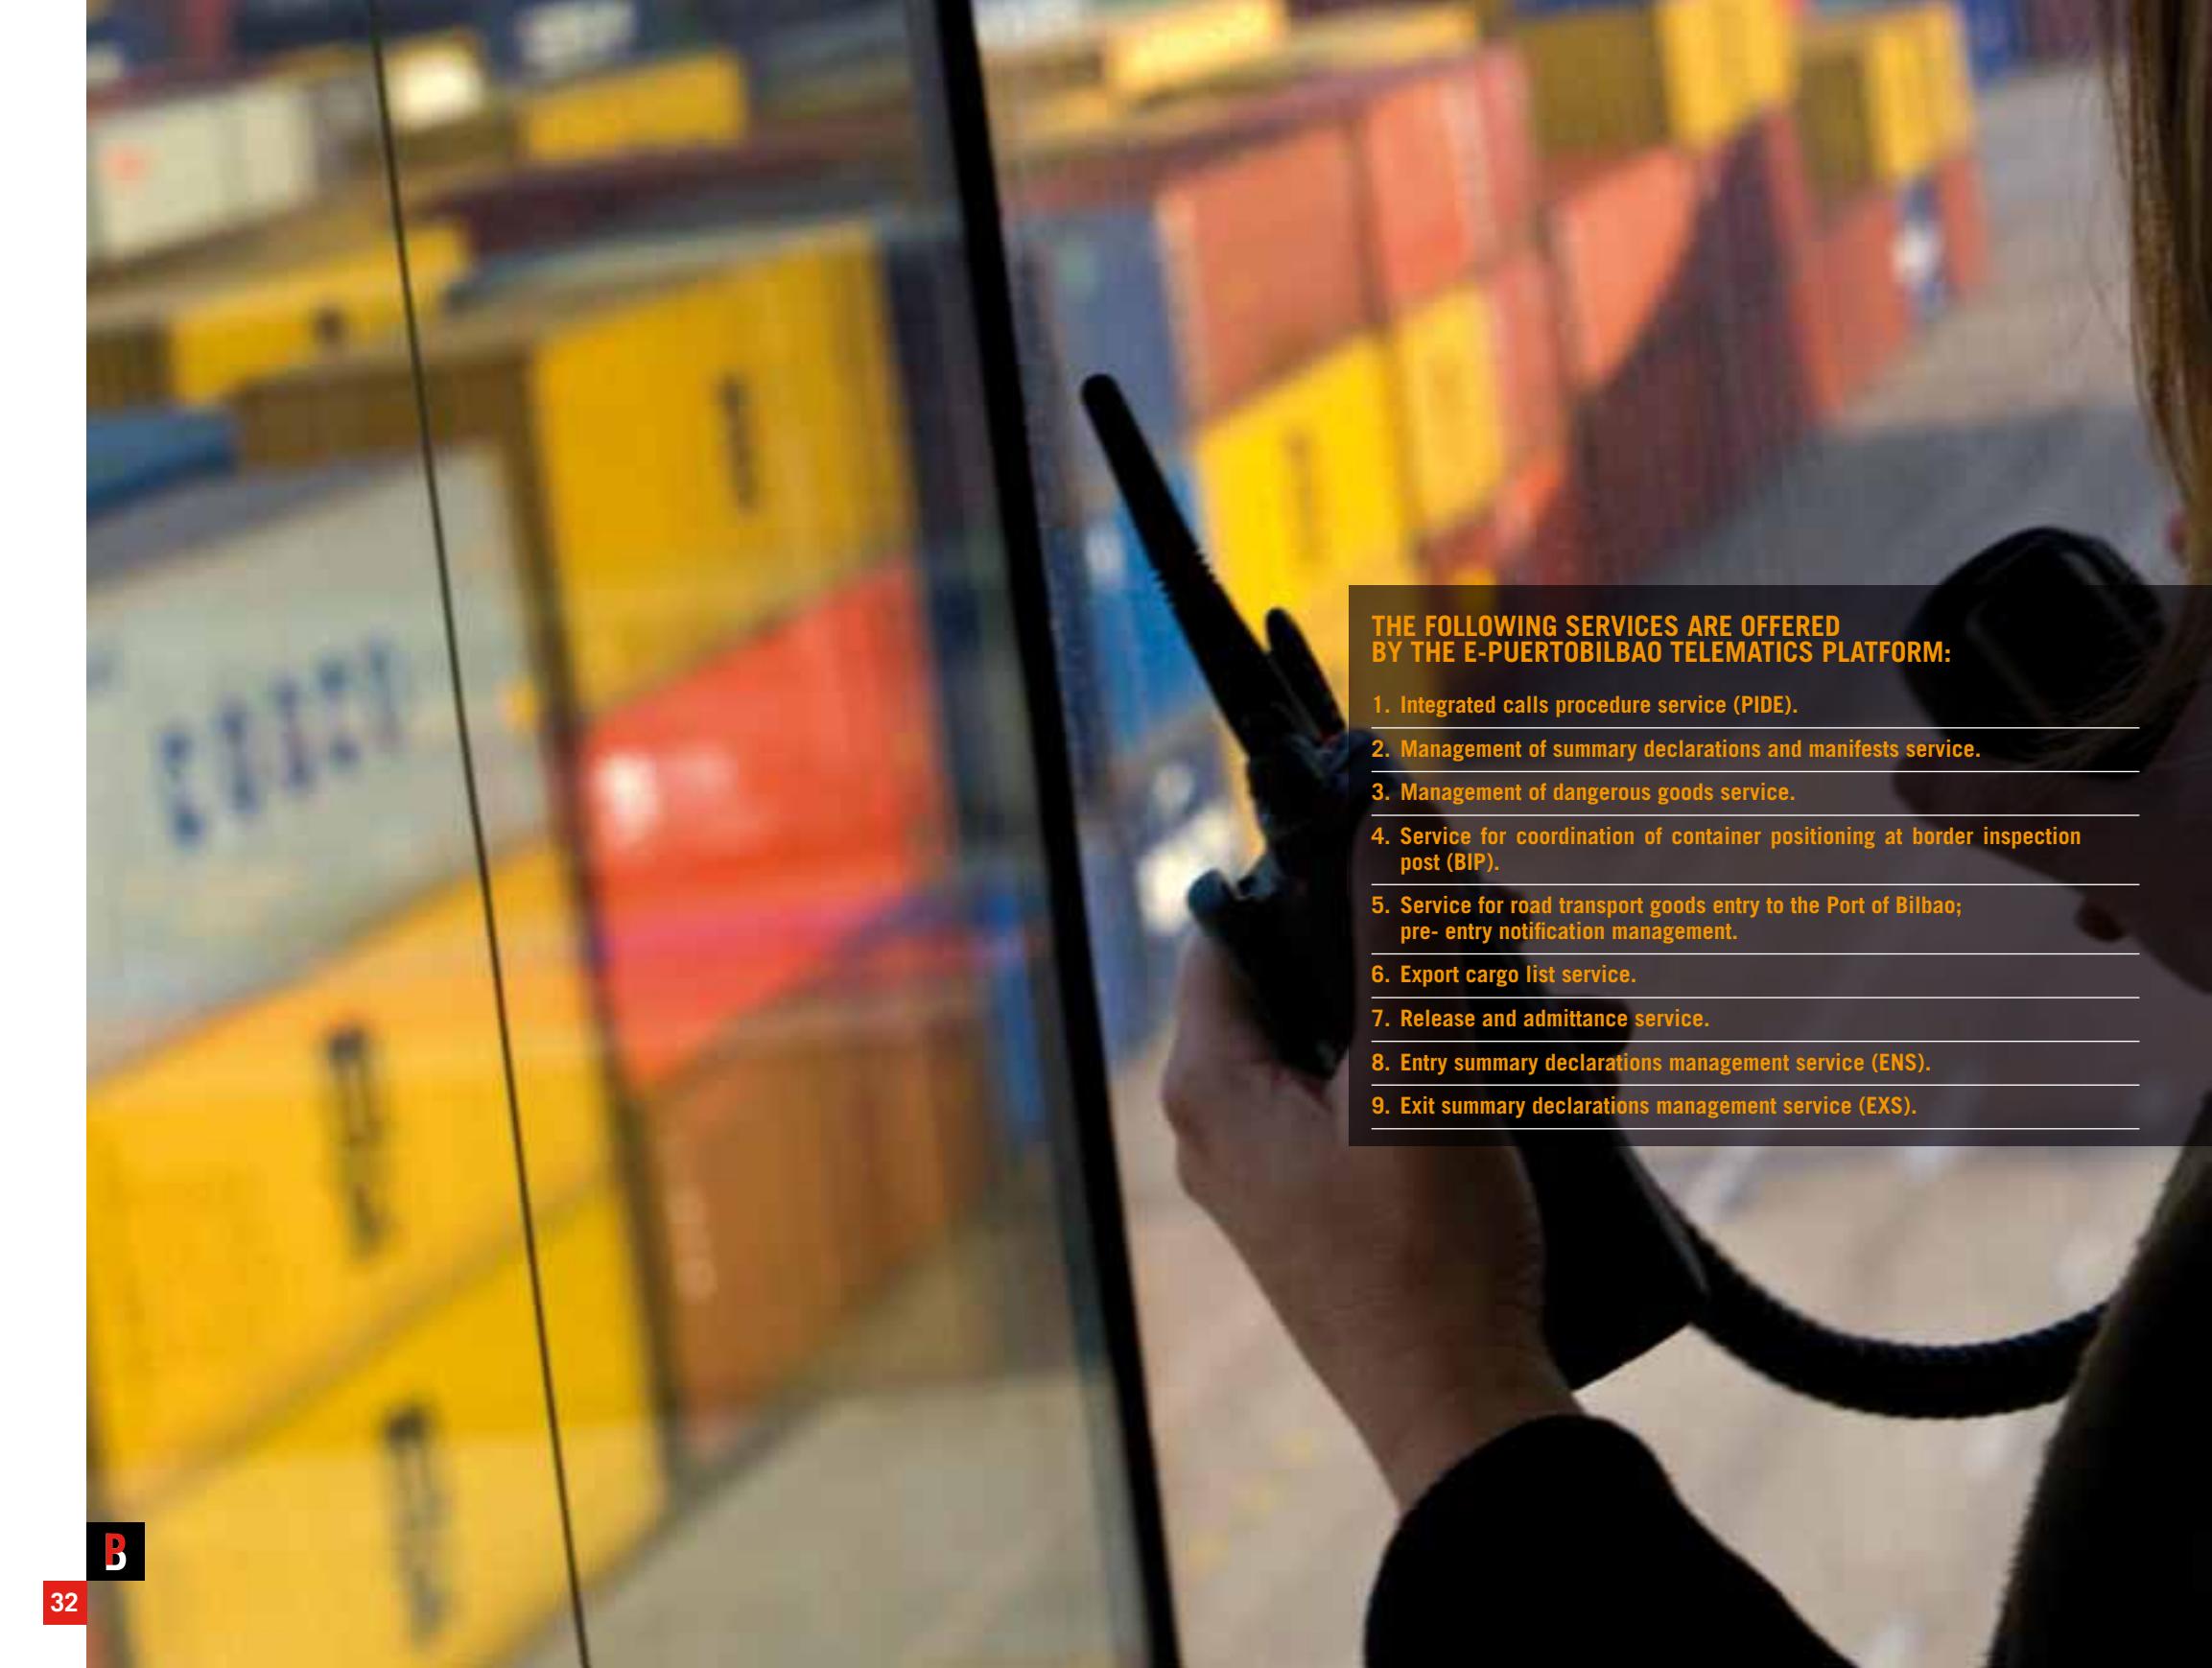

Security is another key characteristics of the Port of Bilbao. In this regard no effort is spared to guarantee high standards in both safety – in work and industrial terms as well as in technological risks and dangerous goods handling - and in security - with the introduction of the International Ship and Port Facility Security Code (ISPS) as promoted by the IMO Security Committee.

With regard to security, the Port Authority of Bilbao, in collaboration with the Interior Department of the Autonomous Basque Government and with the Ministry of the Interior, has an Integrated Security System that provides smooth and effective solutions for the security needs of the many Port users.

**REGARDING "SECURITY",
THE PORT OF BILBAO BOASTS:**

- ➔ Complete protection from the Port Police, 24 hours per day, 365 days per year.
- ➔ An integrated Protection management system.
- ➔ Access controls with a vehicle and person recording system.
- ➔ A port protection plan (RD 1617/2007).
- ➔ A Port Facilities protection plan (reg. CE 725/2005)
- ➔ A Protection Control Centre, equipped with state-of-the-art human and technical resources.

**THE FOLLOWING SERVICES ARE OFFERED
BY THE E-PUERTOBILBAO TELEMATICS PLATFORM:**

1. Integrated calls procedure service (PIDE).
2. Management of summary declarations and manifests service.
3. Management of dangerous goods service.
4. Service for coordination of container positioning at border inspection post (BIP).
5. Service for road transport goods entry to the Port of Bilbao; pre- entry notification management.
6. Export cargo list service.
7. Release and admittance service.
8. Entry summary declarations management service (ENS).
9. Exit summary declarations management service (EXS).

e-puertobilbao

Opting for state-of-the-art technology in the logistic and business processes has been one of the basic premises in the strategic plans of the Port of Bilbao to increase competitiveness. Today, approximately 800 companies use the “e-puertobilbao” technological platform which expedites and simplifies the document exchange processes required to provide shipping and goods services.

A single electronic window
to simplify and improve
operating processes

For Short Sea Shipping operations, by means of the single electronic window, a ship's arrival is cleared before the Port Authority, Merchant Navy and basic Services (pilots, tugs and mooring) with a single click. With a second click the goods departure is cleared. This process is carried out from any location, with no paperwork involved, with the added extra of being able to monitor the ship or goods services “online”.

Other services shall be added to the range of services currently on offer from this platform to complete the whole logistics chain. These services shall serve as a tool for the loader to monitor their goods. Epuertobilbao guarantees top coordination of the complete chain.

RIVER INDUSTRIES

28 RIVER INDUSTRIES AND SHIPIARDS

Bilbaina de Alquitranes

Since its beginnings the River has marked out the history of Bilbao and its industrial development. For centuries, it has boasted large companies on its banks, particularly related to the iron and steel, naval and chemical sectors.

CNN

SHIPYARDS

Astilleros Zamacona and Construcciones Navales del Norte (two shipyards with extensive naval traditions) are to be found on the River of Bilbao, in Santurce and Sestao respectively.

Zamacona

Both companies offer a comprehensive reply to the sector's requirements, regarding ship construction and repairs, consisting in a quality service, with impressive technical capacity. The service's standout features are innovation, research and the development of state-of-the-art technologies.

EXTENSION WORK OVER THE LAST YEARS

Over the years, the Port of Bilbao has evolved, becoming a modern and efficient port, boasting extensive dock areas, with no draught restrictions. In terms of infrastructure, it is currently prepared to deal with intermodal transport challenges in a competitive and globalised business context. To this end, the Port of Bilbao has made a great deal of investment over the last few years.
